

STM Tech Trends 2023 WorldTour

Our Band is playing: the Open Science Song

Launching Tech Trends at the
STM US Conference, Innovations Day
12 April 2019, Washington DC
Eefke Smit, Standards and Technology

ON BASS
COLLABORATE ON INFRASTRUCTURE

- Cross Industry
- Open Publishing Platforms
- Make Infrastructure Connect and Open
- Optimize for Big Data and AI

SHARED INFRASTRUCTURE

- Interoperability Standards
- Cybersecurity
- Platform Syntication
- Easy Access
- RA21

ON GUITAR
TRUST AND INTEGRITY

- Data Integrity
- Ethics for Data Use
- Fact-based Science versus Fake Science
- Trust and My Data
- Privacy and Complexity

TECH TRENDS

WORLD TOUR 2023

THE COLLABORATORS

ON VOCALS
OPEN SCIENCE

- Reproducibility
- Open Publishing Platforms
- Workflow Systems
- Publish all Research Artefacts
- Research Data

ON SAX
A GOOD USER EXPERIENCE

- Make It Easy for the User
- Personalisation
- Decentralised Identity Management
- Better Author Metadata

SHARED INFRASTRUCTURE

- Share in the Cloud
- Amazon Webservice
- 5G: Ubiquitous Speed and Access
- Infrastructure for Plan-S
- Blockchain

DIVERSITY IN A MULTI-USER ENVIRONMENT

AUTHOR

POLICY MAKER

FUNDER

BASSLINE INFRASTRUCTURE

- Collaboration on platforms for:
 - collaboration
 - Transparency
 - revenue up?
- Collaboration on:
 - Peer Review transparency and interoperability
 - Author user experience
 - Research Data
 - Platform standards
 - Blockchain and Open Ledgers
- Make Infrastructures connect and open
- Efficiency drivers:
 - Interoperability standards
 - Publishing platforms
 - Collaboration

RIFFING ON TRUST AND INTEGRITY

- Trust and Integrity tools
- Check Research outputs on integrity
- Trust vs fake science
- Science and politics are dangerous
- Trust and (my) Data
- Data Integrity, Integrity in Data Use
 - Privacy versus personalisation
 - Ethics, Trust
- Privacy and Complexity

OUR OPEN SCIENCE SONG

- Workflow systems for Open Science
 - For researcher and consumer
- Open Publishing Platforms
- Publish ALL research artefacts
- Peer Review-plus (Transform IT)
- From Content facilitators to creators of Tech Tools
- Reproducibility
- Growth of Research Data
- Impact of new output types:
 - Data
 - AI output
 - New library services
 - Google start

A GROOVY USER EXPERIENCE

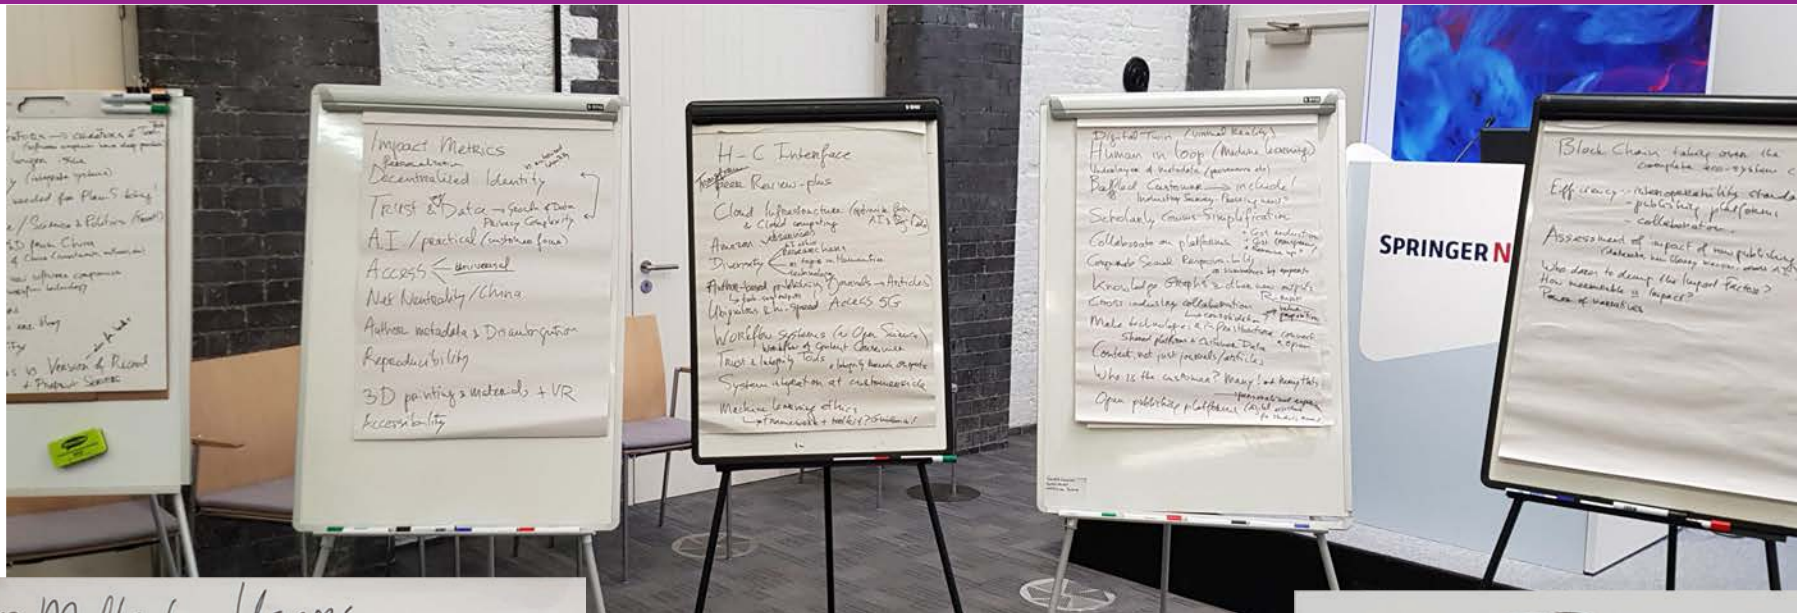

- Customer wears many hats
- Get used to Multiple Users
 - Disconnect buyers and users
 - Who is the user?
 - Can she be a machine?
 - Include the bottom user
- Author-based publishing (from journals to article privacy)
- Access (open, universal, easy)
- Personalization
- Decentralised Identity Management

This was our Future Lab brainstorm this year,
on 3 December 2018 in London:

At The Stables, London: Brainstorm in Delphi-method mode

① Multiple Users

- disconnect buyers - users
- who is the user?
- a machine?

② Data Integrity

- privacy vs. personalisation
- Ethics, Trust

③ AI/Machine Learning, Research Flow

also for internal systems

④ Collaboration via Cloud across Industry

- peer review
- blockchain
- platform standards
- research data
- user experience

⑤ Trust & Integrity

- SciHub

A room full of views

An Editing Committee processes the stuff:

- Heather Staines, Hypothesis
- Renny Guida, IEEE
- Jasper Simons, APA
- Liz Marchant, T&F
- Sameer Shariff, Impelsys
- IJsbrand-Jan Aalbersberg, Chair
- Eefke Smit, STM- S&T
- Matt McKay, STM- Comms
- Stu Design, graphics

Our sponsor: IEEE

The Band: The Collaborators

Playing its golden hit: *The Open Science Song*

The sound: A Good User Experience,
 Trust and Integrity
 Shared Infrastructure

Let's take a look at the audience

They want diversity;
In hiring, in skillsets, in research topics, in research ethics, in machine learning, in algorithms, in publishing, in content focus

It is a multi-user environment;
Authors, readers, researchers, doctors, practitioners, engineers, citizens, parents, funders, policy makers, a new generation

OUR OPEN SCIENCE SONG

- ▶ **Workflow systems for Open Science**
- ▶ **Open Publishing Platforms**
- ▶ **Peer Review-plus (transform it)**
- ▶ **Reproducibility**
- ▶ **Practical AI (Customer Focus)**
- ▶ **Impact of new content/output types:**
 - ▶ Preprints
 - ▶ Data
 - ▶ AI output
 - ▶ New library services
 - ▶ Google stuff
 - ▶ Knowledge graphs
 - ▶ Virtual Reality, parallel computational lab tests
 - ▶ Living articles versus version-of-records
 - ▶ Expert summaries
 - ▶ The power of narratives
- ▶ **Impact Metrics: Beyond the impact factor?**
- ▶ **Metadata**
 - ▶ Proof of Provenance
 - ▶ Author Disambiguation
- ▶ **Digital Twin**

A GROOVY USER EXPERIENCE

- ▶ **Customer wears many hats**
- ▶ **Know thy user**
 - ▶ Create a personalised Experience
 - ▶ Offer a digital assistant
- ▶ **Get used to Multiple Users**
 - ▶ Disconnect buyers and users
 - ▶ Authors and readers
 - ▶ Scientists and Citizens
 - ▶ Who IS the user ?
 - ▶ Can she be a machine ?
- ▶ **Author-based publishing
(from journals to article primacy)**
- ▶ **Human-Computer Interface**
- ▶ **Access (open, universal, easy)**
- ▶ **Decentralised Identity
(versus authorized identity)**
- ▶ **Accessibility**
- ▶ **Solve fragmentation at the
customer side**

RIFFING ON TRUST AND INTEGRITY

▶ **Publisher and Vendor Ethics**

- ▶ Integrity Check on Research outputs
- ▶ Data Integrity
- ▶ Integrity when using someone's Data
- ▶ Corporate Social responsibility

▶ **Communication and Education**

- ▶ Trust versus fake science
- ▶ Include the baffled customer who finds it all too complex
- ▶ Science and politics are a dangerous combination

▶ **Author/Researcher Trust**

- ▶ Trust and (my) Data
- ▶ Privacy versus personalisation

▶ **Trust and the Machine**

- ▶ Machine Learning Ethics
- ▶ Keep the Human in the Loop for Machine Learning
- ▶ Practical AI (Customer Focus)

BASELINE INFRASTRUCTURE

- ▶ **Cross-Industry Collaboration in the Cloud**
 - ▶ Better user experience
 - ▶ Research data
 - ▶ Platform standards
 - ▶ Peer Review transparency and portability
 - ▶ Blockchain and Open Ledgers
- ▶ **Interoperable Open infrastructures**
- ▶ **From content creators to facilitators of Tech Tools**
- ▶ **Platform Collaboration**
 - ▶ Cost reduction
 - ▶ Transparency
 - ▶ Revenue up
- ▶ **Integrate systems**
 - ▶ Drive Efficiency
 - ▶ Interoperable standards
- ▶ **Shared platforms and customer data**
