

2024 Second Zhuhai Conference on Research Evaluation and Academic Publishing & Symposium on Journal Development and Indexing Database: New Policies and Trends

A healthy research ecosystem is a crucial factor in advancing scientific progress. Building this ecosystem requires the participation of the global academic community, with collaboration among policymakers, researchers, academic publishers, and evaluation agencies. In December 2023, the first Zhuhai Conference brought together representatives from these stakeholders to discuss initiatives for building a robust research ecosystem and to sign a memorandum on research integrity.

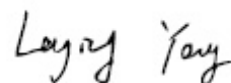

From December 1 to 4, 2024, we will host the second Zhuhai Conference, focusing on the challenges faced in research evaluation and academic publishing in the context of the rapid development of open access (OA) and artificial intelligence (AI) technologies. The conference will be divided into two parts: the seminar and the forum.

The seminar will cover the following topics:

1. "Responsible Academic Publishing and Research Evaluation" (Perspectives from various stakeholders)
2. Current Status, Tools, and Practices in Building Research Integrity
3. Annual Progress of the CAS Journal Ranking Team
4. Launch of the Global Open Access Journals Index (OAJ)

The forum will invite experts from well-known academic journal indexing systems (such as JCR, SCOPUS, DOAJ, etc.). The event will also feature roundtable discussions, in-depth interviews, and hot-topic panels, providing a platform for speakers and attendees to engage in meaningful exchanges.

We cordially invite researchers, academic journal agencies, policymakers, and academic publishers to join us in Zhuhai to contribute to the healthy development of the global research ecosystem. We look forward to seeing you in Zhuhai!

Conference Chair
Prof. Yang Liying

Director, Department of Scientometrics and Research Evaluation of CAS

Organized by

CAS Journal Ranking, National Science Library of Chinese Academy of Sciences, China
CEPIEC

International Academic Center of Complex System, Beijing Normal University at Zhuhai

Chinese Society for Science and Technology Periodicals Research Academic Integrity and Copyright Working Committee

Journal of Data and Information Science

Science and Technology Publishing Research Center of CAS (the Think Tank of the General Administration of Chinese Press and Publication)

NSL-WILEY Journal Innovation Joint Laboratory

NSL-Wolters Kluwer Medical Evaluation and Data Intelligence Joint Laboratory

Venue: Zhuhai City, China Similan Hotel Zhuhai

Agenda

December 1, Registration and hotel check-in

December 2, Plenary speech

December 3, Morning Plenary speech

December 3, Afternoon:

Forum on Web of Science

Chinese Science Citation Database

December 4, Forum on new development, trends and policies of

- Scopus

- Open Access Journal Index

- DOAJ

- "Excellent Journals" Program of Chinese Association of Science Technology

- CAS Journal Ranking and Warning Journal list

December 5, Departure

Invited speech

Dr. Nandita Quaderi, SVP, Clarivate, Editor-in-Chief of Web of Science

Dr. Shen Cenyu, Deputy Head of Editorial (Quality), DOAJ

Miriam Maus, Chief Publishing Officer, IOP Publishing

SCOPUS Global Selection Committee

CAS Journal Ranking

OAJ

Chinese Science Citation Database

Chinese Excellent Journal Program

INSPEC

Global Publishing Houses

Journal Editors-in-Chief and Editorial Managers

Special report chair: Prof. Yan Shuai

Registration & Accommodation

For Global attendee, please contact:

Mr. Chen Fuyou Tel. 0086-15201072856

Ms. Tong Sichao Tel. 0086-15600602031

Hotel Reservation Tina Wang 1725407818@qq.com

About National Science Library, Chinese Academy of Sciences

Affiliated with the Chinese Academy of Sciences (CAS). The core mission of NSLCAS is to provide comprehensive literature and information services, high-level scientific exchanges and communication services.

About CAS Journal Ranking Team

The CAS journal ranking team comes from the National Science Library of the Chinese Academy of Sciences. The team has released several authoritative research assessment systems based on quantitative data. Among them, the CAS Journal Ranking and Early Warning Journal List have had a profound impact on the Chinese research community.
