

About MDPI

MDPI is a publisher of fully peer-reviewed, Open Access journals with a focus on robust and rapid editorial processes.

Our aim is to ensure that high-quality research is verified and made available to the research community as quickly as possible.

MDPI stands at the forefront of the Open Access movement, having launched its first online journal *Molecules* in 1996.

Today, MDPI is a leader in Open Access and publishing more than 400 journals across all research disciplines. Every article is published under a Creative Commons Attribution License.

Our Mission and Values

Open Access

We offer access to science and the latest research to readers for free. All of our content is published in open access and distributed under a Creative Commons License, which means published articles can be freely shared and the content re-used, upon proper attribution.

Timeliness and Efficiency

We aim to publish fast to ensure the latest research is rapidly disseminated, using thorough, precise editorial work. By assisting editors and reviewers all along the peer-review process, a first decision is provided to authors in three weeks; once accepted, papers are published in under a week (median times for papers published in 2022).

High Quality Service

We aim to provide a service that supports scholars and their work. By offering a range of different options, including journal publication at mdpi.com, early publication at preprints.org and conferences on sciforum.net, we

support scientific communities worldwide to make a positive impact on research.

Simplicity

All of our tools and services can be found in one place and prioritize user-friendliness. Simple processes keep our editorial process highly efficient.

Flexibility

In a changing and evolving publishing environment, we are constantly adapting and developing new tools and services. By listening to feedback from authors, editors and readers, we can make changes to better meet the needs of our research community and keep MDPI relevant.

Rooted in Sustainability

In addition to being at the root of MDPI and a key theme in our journals, we support sustainability by ensuring the long-term preservation of published papers, and the future of science through partnerships, sponsorships and awards.
