Aries Systems Overview

Aries Systems transforms and revolutionizes the delivery of high-value content through the power of innovative technologies. Our highly customizable and flexible workflow solutions help disseminate human knowledge on a global scale. Our solutions manage the complexities of the traditional publishing workflow, from submission to publication distribution.

## Our Solutions

em Editorial Manager®

The leading cloud-based manuscript submission and peer review tracking system

pm ProduXion Manager®

The leading cloud-based commercial production tracking system

A Robust End-to-End Workflow Solution

Create custom and automatic workflows to publish smarter and faster. Editorial Manager® and ProduXion Manager® seamlessly work together to offer a robust end-to-end solution designed to streamline your workflow from manuscript submission to publication and beyond.

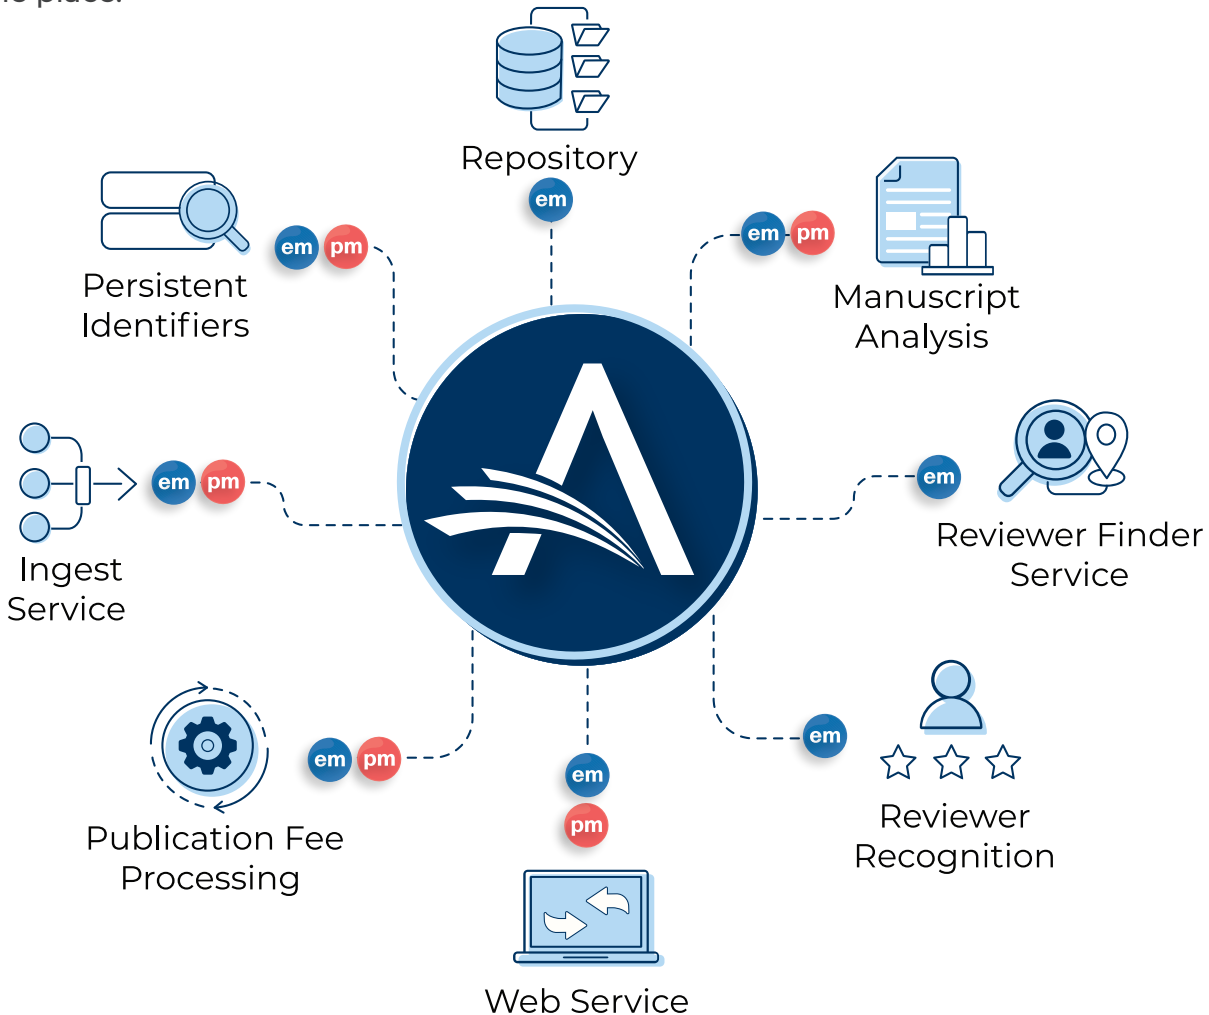

Personalized Support

As a trusted partner, Aries provides dedicated support by pairing every journal with an Account Coordinator (AC) to deliver personalized, high-quality service. Aries is committed to delivering best-in-class support for our clients from pre-launch through post-launch and beyond. Equipped with extensive experience with editorial workflows and transition management, our ACs work diligently to identify your objectives, train and configure your deployment to suit, and provide ongoing support.

An Ecosystem Designed to Enhance Your Workflow

Aries Systems' general and purpose-built APIs and integrations are designed to connect industry-leading technology with Editorial Manager, providing publishers with best-in-class tools all in one place.
