

HighWire

Powered by MPS

Connecting the Best Minds to the Most People

HighWire is an industry leading global provider of digital publishing tools and platform solutions across all aspects of the publishing life cycle including content management and hosting, access and identity management, manuscript submission and tracking, e-commerce, and analytics. It is an independent subsidiary of MPS Ltd, the global partner to the world's leading enterprises, publishers, learning companies, and content aggregators.

HighWire provides software solutions for the entire publishing process

- **Submission and Workflow:** processing of scholarly content, from submission to publications
- **Identity management:** enterprise access and entitlement management of content assets and other services
- **Hosting:** delivery of intellectual assets such as journals, books, media, etc.
- **Subscription management and fulfillment:** processing of orders for periodical subscriptions, books, and other assets; fulfillment of those orders
- **Analytics:** Content distribution and popularity, usage statistics, COUNTER, library usage

HighWire Hosting Solution

HighWire Hosting

Hosting is what HighWire is famous for! HighWire Hosting enables the academic and scholarly community to display, disseminate, analyze and monetize their content online, using an intuitive, flexible and easy-to-use publishing platform. HighWire lets you think outside the box because each site is customizable, extensible and can keep up with the changing expectations of the online community. The platform supports not only books and journals, but any content type such as news, videos, technical standards and manuals, case studies, systematic reviews and reference works. HighWire Hosting also provides a full range of tools to support the publishing lifecycle: from content ingestion, preview and embargo support, publication, alerts, browse, search, taxonomic support, discovery, access control, eCommerce and analytics.

HighWire Identity Management Solution

Sigma

Sigma provides seamless access for readers and centralized access control for administrators. Sigma integrates into any hosting platform, allowing SSO from any device in any location, allowing researchers, students, and practitioners to access information remotely. Sigma lets publishers and institutions control their content without compromising accessibility.

HighWire Workflow Solutions

DigiCorePro

DigiCorePro is a next generation end-to-end publishing workflow solution based on the principles of single source publishing, a methodology that puts scholarly content at the center of the publishing process, reducing inefficiencies and increasing the speed of delivery. This publishing system provides editorial services in an automated and customizable way, from article concept to publication. DigiCorePro supports content authoring, online submission, editorial and peer review tracking, interactive peer review, post acceptance production tracking, and delivery to hosting platforms and print services.

The term single source publishing refers to the fact that the publishing process is being carried out in real time, with constituents and stakeholders able to access and manipulate the content within the system. DigiCorePro takes advantage of modern modular architecture allowing for innovative microservice integrations, including third-party tools and services.

HighWire Analytics Solutions

Impact Vizor

Impact Vizor was specifically designed to meet the needs of journal editorial teams to help them understand and optimize the impact and reach of their content in real-time, delivering insights for data-driven editorial decisions.

Insight Vizor

Insight Vizor is a platform-independent analytics tool that provides information about the usage of the scholarly content, enabling business decisions for editorial, sales and marketing executives so that they can identify prospective leads or uncover content with greater reach.

ScholarlyStats

ScholarlyStats is a cloud-based platform that empowers librarians, consortia, and institutions to streamline the title selection process by collecting, consolidating, and distributing usage analytics to help drive informed business decisions.

HighWire E-Commerce Solution

THINK365

THINK is a web-based order management and customer service platform, providing seamless renewals, payments, and billings processes, along with industry-class inventory management and flexible fulfillment services.

Fulfillment

End-to-end subscription management services that help in financial reporting, invoicing, lapses chasing, renewals, creating dashboards and much more. Our ERP-agnostic services have helped publishers save up costs, reduce undelivered returns and improve customer satisfaction.
