

ProduXion Manager®

Powered by: 

Aries Systems' ProduXion Manager® (PM) is a cloud-based production tracking system for scholarly journals, reference works, books, and other publications employing value-added pre-press and digital workflows. The highly configurable workflow management system manages metadata and files, and automates communication between Authors, in-house staff, and vendors.

Role-Based System

PM comes equipped with configurable role permissions.

Author

- Easily create Author proofs
- Perform status updates

Editor

- Assign and track tasks
- Transmit files to/communicate with external vendors
- Review and approve proofs

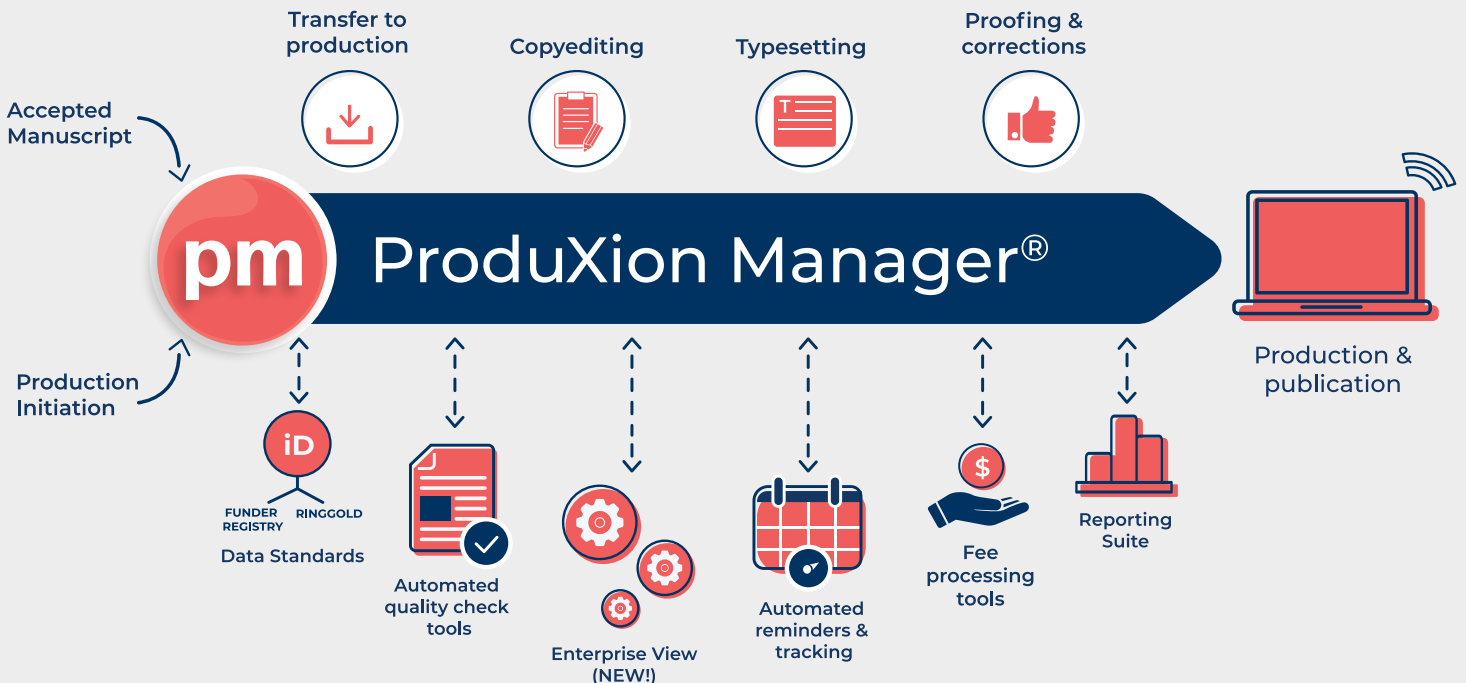

External Vendors

- Receive and submit production tasks

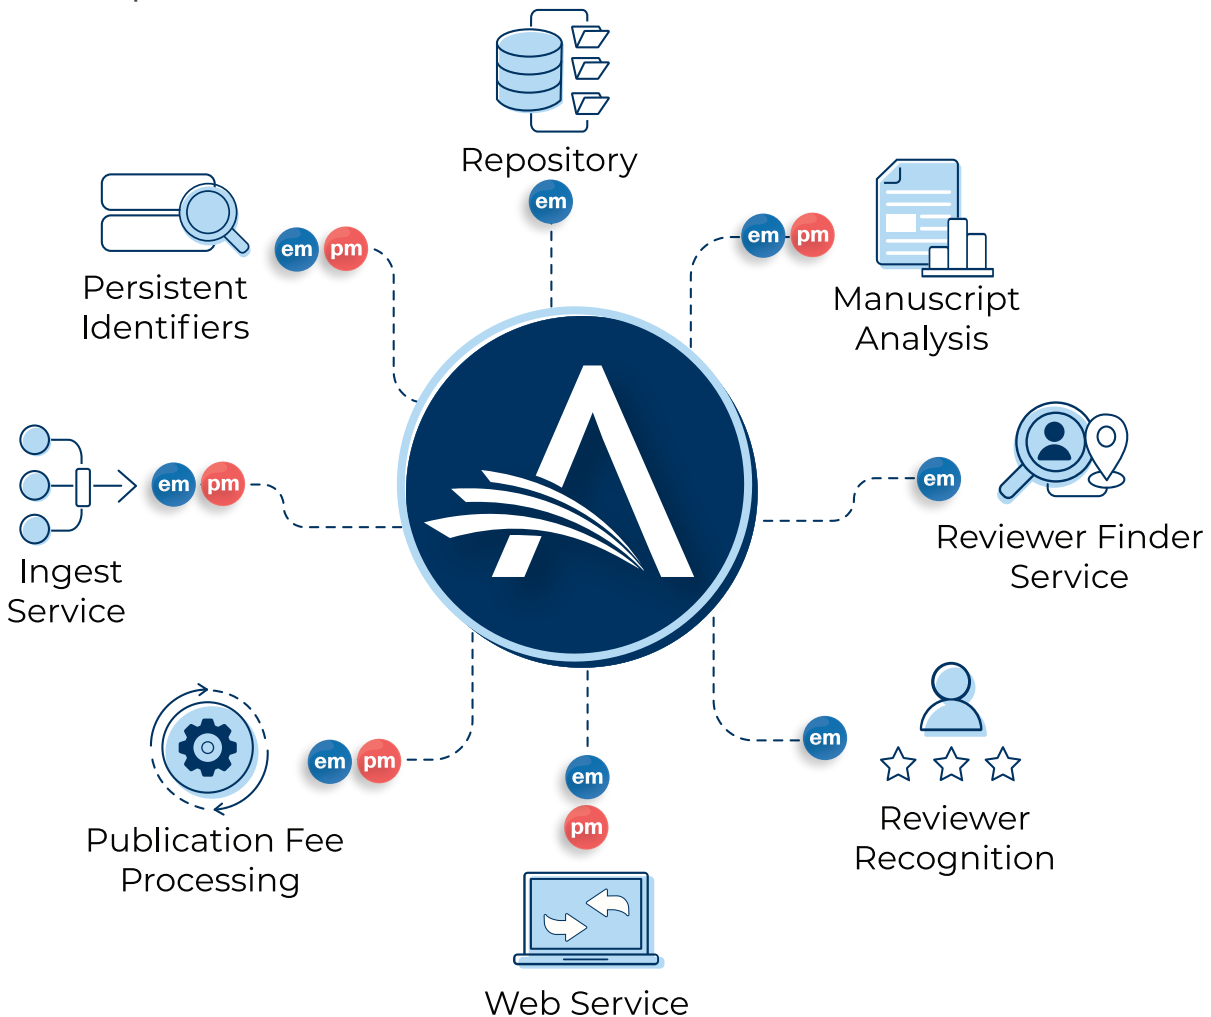

Customizable Workflow, Personalized Support

ProduXion Manager empowers journal offices to customize their issue- and article-based workflows at no additional cost. As a trusted partner, Aries provides dedicated support by pairing every journal with an Account Coordinator (AC) to deliver personalized, high-quality service.

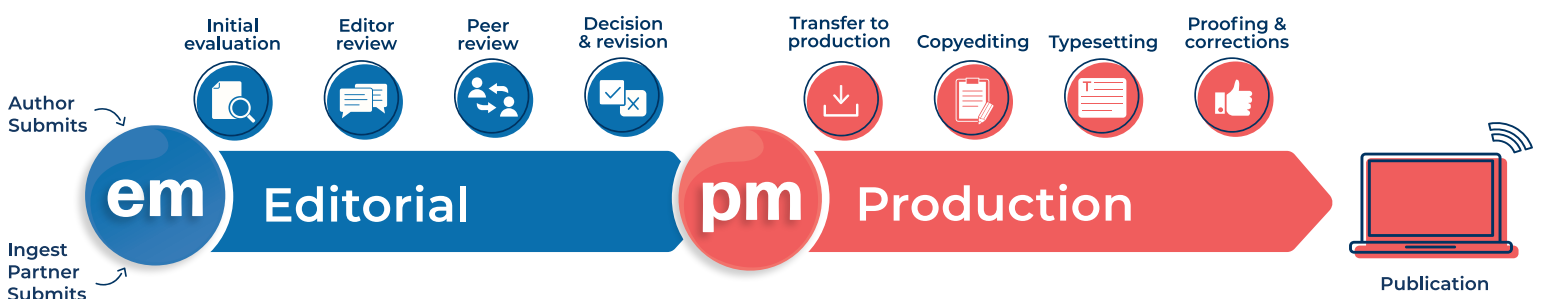

An Ecosystem Designed to Enhance Your Workflow

Aries Systems' general and purpose-built APIs and integrations are designed to connect industry-leading technology with ProduXion Manager, providing publishers with best-in-class tools all in one place.

Achieve a full end-to-end workflow by pairing PM with editorial systems like Aries' Editorial Manager® solution for manuscript submission and peer review tracking.
